

# GUIDO PERLA & ASSOCIATES, INC.

Naval Architects

Marine, Mechanical & Electrical Engineers

## LEAD PIPING DESIGNER

Guido Perla & Associates, Inc. (GPA) is looking for a Lead Piping Designer to join our expanding staff.

### Primary responsibilities will include:

- / Supervise and mentor the Senior and Junior Pipe designers in the Production Engineering Department.
- / Report scheduling task percentage and changes to the functional design to the Production Engineering Supervisor.
- / Meet with other Leads in coordination meetings to develop a working plan for the following week.

### Additional responsibilities will include:

Training, work assignments, and standards development for the Piping Production Department. The candidate will be expected to produce 3D Shipconstructor models and Arrangement and Detail drawings.

As a Lead, you will supervise 3D Shipconstructor modeling, monitor the Shipconstructor Piping catalog, maintain company piping standards, and quality assure Arrangement and Detail drawings.

The ideal candidate should have at least six years experience in the marine design industry with particular emphasis in Shipconstructor Pipe modeling and Arrangement and Detail drawings, multiple system routing, and equipment connection and be well versed in regulatory and classification requirements (ABS, USCG, etc.).

At-sea or shipyard experience is a plus.

A US residence visa or work permit is required. GPA offers competitive compensation and excellent benefits.

Please send your resume to [hr@gpai.com](mailto:hr@gpai.com)
